

History

The SWITCHCRAFT LLC, founded in the year 2000, is an internationally expanding manufacturer of high-quality medium-voltage systems and turnkey solutions for smart grid and smart metering networks.

The goal was initially to develop new switchgears to overcome the traditional limits and to produce and sell electrical switchgear with the newest generation equipped with pole - technology and magnetic drives. In 2004 the development of gas-insulated switchgear and modern ring main units has been added.

The Switchcraft Europe GmbH, founded in the year 2006, is located in Dinslaken (NRW), Germany. The Company is involved with the development, manufacturer, installation and sale for switchgear systems.

In 2007 SWITCHCRAFT set a major milestone in the switchgear industry with the development and patenting of the smart, solid-insulated switchgear iSIS.

To extend the business coverage worldwide a partnership with the Easun Reyrolle Ltd has been started in 2008.

The Indian manufacturer is a leader in the field of modern protective relays and switchgears.

Internationality

Due to high quality of the products and the versatile structure of the product range, SWITCHCRAFT Europe GmbH is at home on both national and international markets.

The ERL Group has offices in India, Germany and Canada and provides the necessary synergy for a successful international cooperation.

Technical know-how and cost-effective production at the highest quality standards are a guarantee for maximum satisfaction of our customers.

Quality and Environmental Management

SWITCHCRAFT Europe GmbH as well as the ERL group are demanding the highest standards to the quality of their products and meets the requirements of DIN EN ISO 9001:2008

Additionally SWITCHCRAFT Europe GmbH is committed to protect the environment and will meet the requirements of ISO 1401:2004.
